PROFESSIONAL SUMMARY

QA Engineer with 1 year of experience in manual testing across ERP, CRM, e-commerce, and mobile applications. Skilled in Selenium (Java), TestNG, and Page Object Model (POM) with hands-on experience building end-to-end automation frameworks. Possess working knowledge of API, performance, and security testing using Postman and JMeter. Seeking an Automation QA / SDET role to deliver scalable, reliable, and high-quality testing solutions.

TECHNICAL SKILLS

Automation: Selenium WebDriver (Java), TestNG, Page Object Model (POM), Maven
Programming: Java, SQL (basic), Javascript
API Testing: Postman, REST API (CRUD), JSON Validation, DevTools Network Analysis
Reporting & Data: Allure Reports, Extent Reports, Apache POI (Excel data-driven testing)
Performance & Security: JMeter (Load & Spike Testing), Basic Security
CI/CD & Version Control: Git, GitHub, Jenkins (Jenkinsfile, basic pipeline)
Manual Testing: Functional, Regression, Smoke, UI, Cross-Browser, Mobile, E-Commerce Flows

PROFESSIONAL EXPERIENCE

Software Test Engineer Apr 2025 – Present
Shrewd Business Solutions — Coimbatore, Tamil Nadu

Manual Testing

- Executed functional, regression, smoke, and UI testing for ERP, CRM, and enterprise applications across web and mobile.
- Designed test cases for positive, negative, and edge scenarios; validated dashboards, multi-step forms, RBAC flows, and e-commerce checkout.
- Performed cross-browser/device compatibility and mobile app testing (consulting, pest control, digital gold).
- Logged and tracked defects end-to-end with structured reports, severity classification, and reproduction evidence.

Automation Testing (Selenium + Java)

- Developed and maintained automation scripts using Selenium WebDriver (Java) with TestNG and Page Object Model architecture.
- Automated key workflows including login, multi-step forms, booking flows, smoke & regression suites; handled dynamic XPath, explicit waits, modals, and toast validations.
- Implemented file upload automation (PDF/Image), integrated Allure reporting with automatic screenshots on failure, and enabled data-driven testing using Apache POI (Excel).
- Configured Maven build management, TestNG XML suites, and executed automation tests through Jenkins for scheduled and manual test runs.

API, Security & Performance Testing

- Performed API testing using Postman (GET, POST, PUT, DELETE); validated JSON responses, status codes, and basic UI-to-backend data consistency.
- Gained practical exposure to authentication, RBAC, and common security scenarios such as IDOR, XSS, CSRF, and parameter tampering.
- Executed basic load and spike testing using JMeter; analyzed response time, throughput, and error rates to identify potential performance issues.

AUTOMATION PROJECTS

Alatron Vendor Web Automation github.com/Ananth-QA/alatron-vendor-web-automation
Selenium • Java • TestNG • POM • Maven • Allure • Extent • Jenkins • Git

- End-to-end automation of vendor portal: login, form submissions, booking flows, and multi-file PDF/image uploads.
- Integrated Allure reporting with failure screenshots and a Jenkinsfile-based CI pipeline.

Poppy Admin Automation github.com/Ananth-QA/poppy-admin-automation
Selenium • Java • TestNG • POM • Maven • Allure • Git

- Automated key functionalities including login, poster and video creation, management (edit/delete), and file download features.

EDUCATION & CERTIFICATIONS

MCA — SNS College of Technology, Coimbatore CGPA: 8.04
BCA — Yadava College, Madurai CGPA: 7.5

Certifications: Test Automation Foundations (LinkedIn Learning) • Manual Testing Fundamentals (Great Learning) • SQL for Beginners (Prepinsta)
